

Residential and Business Natural Gas Conversion Rebate Program

Effective Date: September 26, 2017 – June 30, 2018

The City has the option to end the program early or extend it without public notice

Notes: This program replaces the current Gas Rebate Program for customers and builders dated March 14, 2017 through December 31, 2017.

The Residential Natural Gas Conversion Rebate Program has two options for rebate. The service line option cannot be combined with the conversion option.

Whenever the Board of Mayor and Aldermen is of the opinion that it is in the best interest of the City of Munford and its natural gas customers to alter this policy, such policy may be altered upon terms and conditions, or eliminated as approved by the same board.

Conversion Option

Existing natural gas customers of the City of Munford Gas Department may qualify for a rebate of \$150.00 for the following:

1. Conversion of electric or propane water heater to natural gas (\$150 each if more than one);
2. Conversion of electric or propane clothes dryer to natural gas;
3. Conversion of electric or propane heating system to natural gas; THE HEATING SYSTEM MUST BE THE PRIMARY SOURCE OF HEAT FOR THE RESIDENCE (\$150 each if more than one).

Service Option

Existing Residences or Businesses that are not currently customers of the Munford Gas Department may qualify for the following:

Up to 300 feet of service line and a 250 meter installed at one-half (1/2) of the prevailing rate for gas taps at the time of application, when the primary source of heat will be natural gas. Larger meters will require an additional cost.

This policy was enacted and approved by the City of Munford Board of Mayor and Aldermen on Monday September 25, 2017.
